SIZE

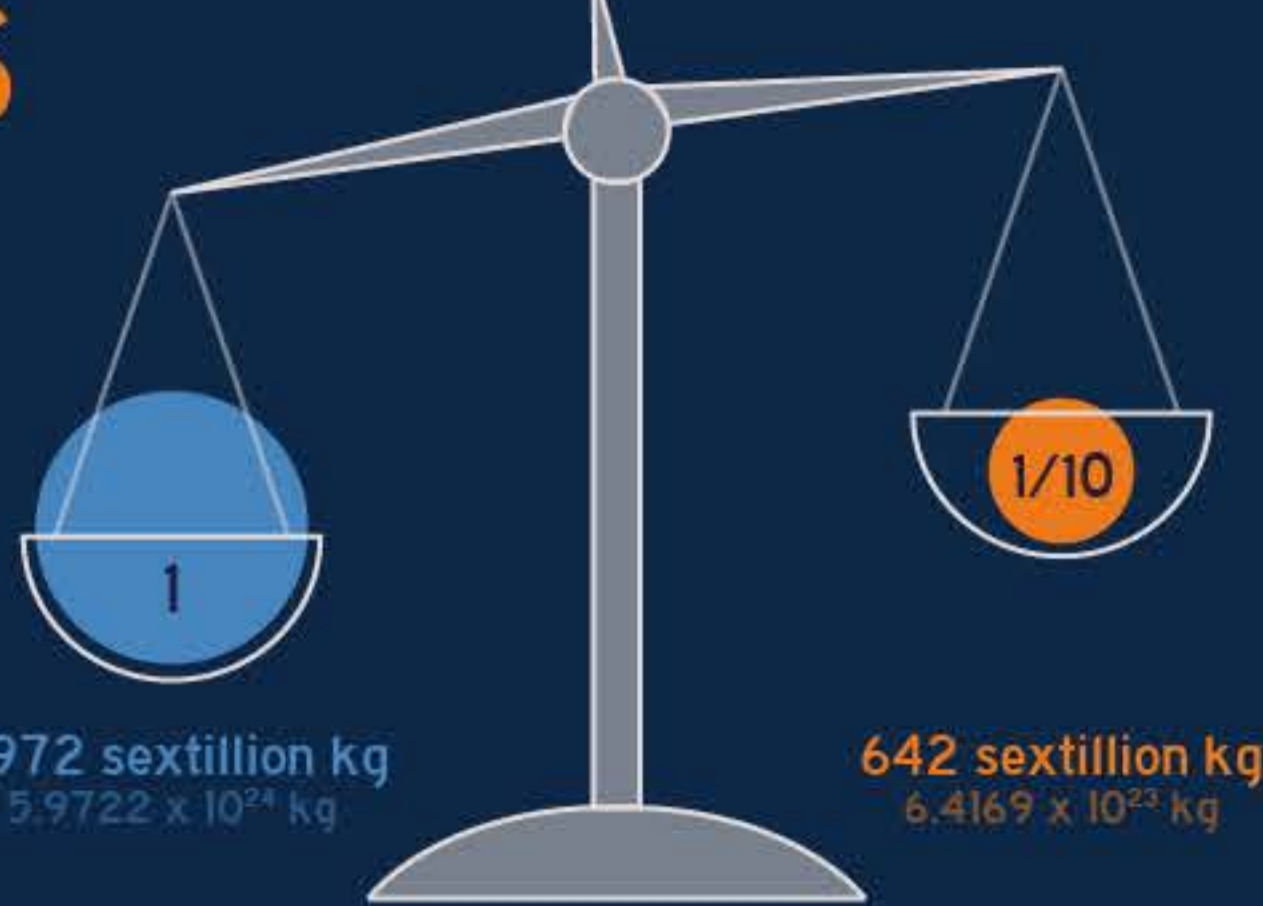

[equatorial diameter]

The land area of Earth is similar to that of Mars.

MASS

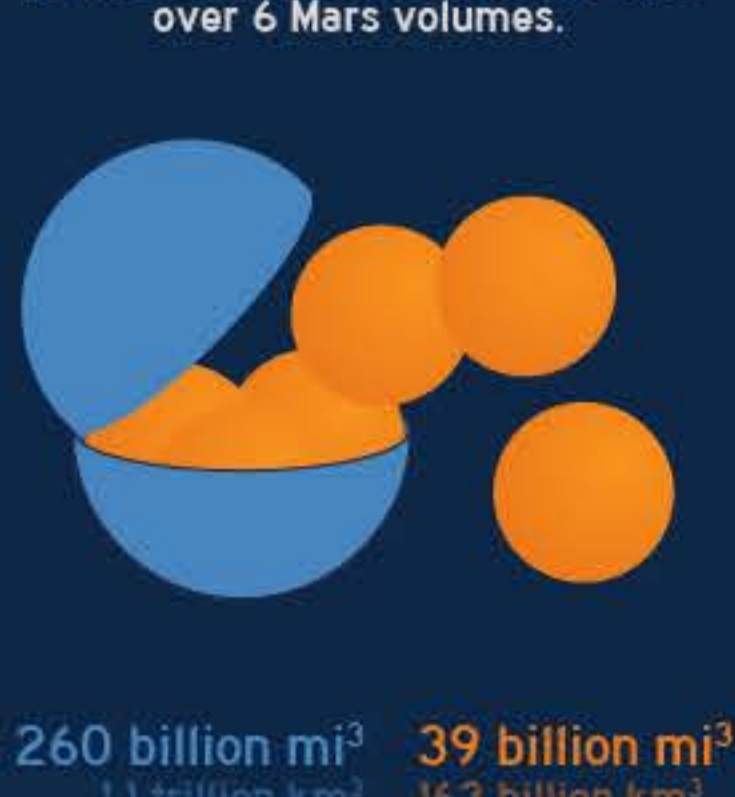

[amount of matter]

VOLUME

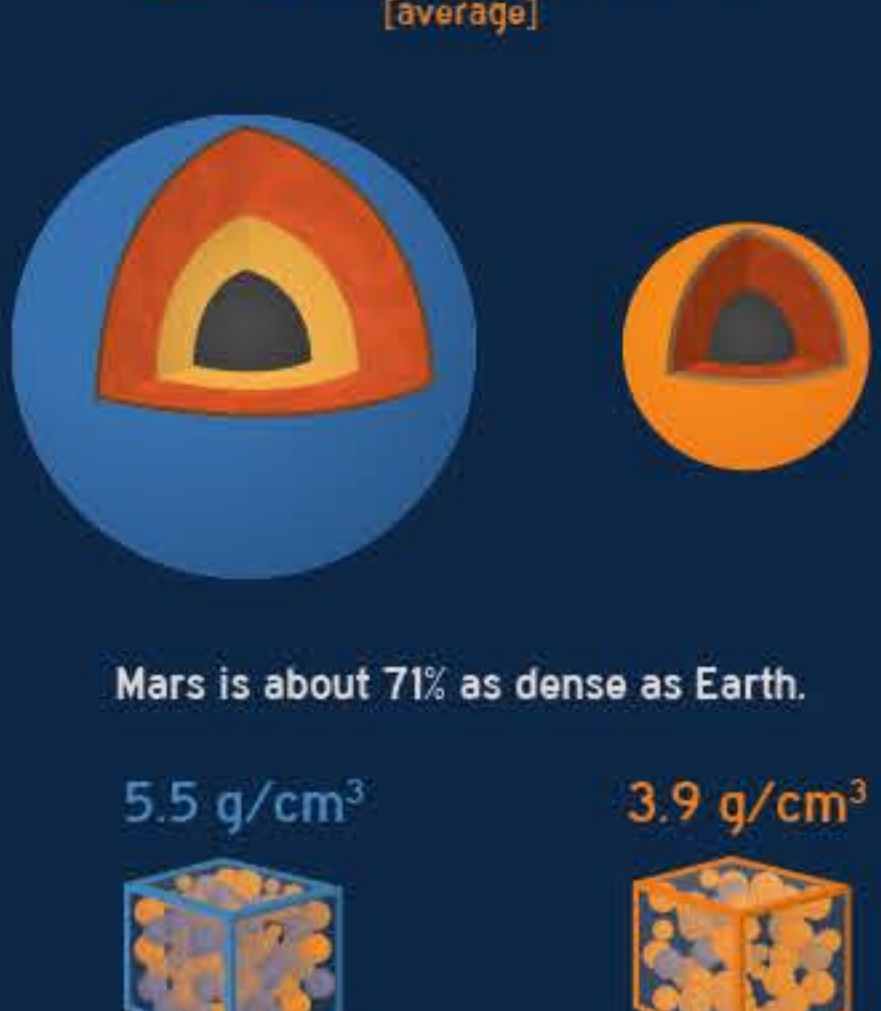

[amount of space occupied]

Mars has about 15% of Earth's volume. To fill Earth's volume, it would take over 6 Mars volumes.

DENSITY

[average]

Mars is about 71% as dense as Earth.

5.5 g/cm³

3.9 g/cm³
